

EUROGLASS
FRAMELESS GLASS SHOWERS

SIMPLY THE BEST

EUROGLASS SHOWERS CUSTOM MADE TO YOUR REQUIREMENTS

EUROGLASS

LARGE SHOWER

Ideally suited for extra large shower enclosures, Euroglass showers can be bold and expressive, reflecting the unlimited possibilities of design.

RECTANGULAR SHOWER

Euroglass showers can be installed directly onto a suitably tiled floor for a clean, contemporary look, while the combination of glass with granite or marble makes a statement of unashamed luxury.

CURVED SHOWER

A curved door introduces a look of elegance and adds extra space inside the shower enclosure.

CORNER SHOWER

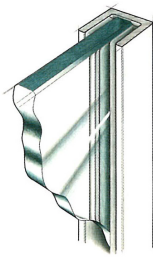

Where space is restricted, the shower rail can be mounted directly on the glass, preventing water splashing outside the shower when the door is opened.

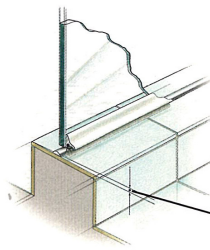

Where space is restricted or your preference is for a shower over the bath, you don't need to resign yourself to the use of shower curtains on a rail. There are many possibilities involving the use of Euroglass components and one of our consultants will be happy to design an installation to suit your requirements.

DESIGN & CONSTRUCTION

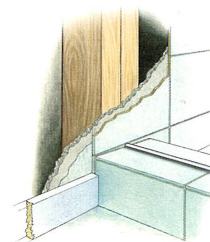

CHANNEL

The channel is silicone fixed to the wall and base to support free-standing glass panels. Channel is available in a variety of powder coated or anodise finishes.

WATER SEAL

An optional extra which is attached to the bottom inside edge of the door. It has the dual purpose of shedding water away from the door and preventing splashing under it. 5mm minimum inwards fall is desirable on tiled threshold.

TIMBER FIXING

For doors hung directly from the wall, the builder should ensure adequate timber fixing is provided prior to sheeting the shower walls.

BEFORE YOU START

For best results, we recommend you contact us as early in your job as possible. Our technical specialists can assist you with your design ideas and, most importantly, help ensure all necessary wall stud or other relevant structural supports are in the correct position during construction and that your tiling layout matches the shower screen design and position.
