

An Enriching LEGO® Experience

Multi-sensorial - uses the senses of touch, hearing and sight when children build and move their models.

Multi-faceted - encompasses the 4 components essential for making a video.

An Enriching LEGO® Experience

Age 6 & up

Key learning values

- Learn the skills of filming.
- Plan and draw out a story line in a story board.
- Build up patience.
- Make your own story come alive.
- Adding narration and sound effects.

Put the children's imaginative story into a short movie. Let them be the director, script writer and camera man. This program uses state of the art stop motion animation program iPad Mini. Let the story come alive with MY 1st 3D Animation.

MY 1st 3D Animation teaches young children to do stop motion animation using Apple iPhone and MacBook. A 10 lesson package allows children to learn how to craft a story with narration and create a 1 to 2 minute video clip.
