

SunSmile® Herbal Toothpaste

Toothpaste to Smile About

Teeth cleaning is one of mankind's oldest and most basic forms of hygiene. With today's modern advances, oral care manufacturers should be able to provide consumers with toothpastes that are effective and safe. However, this isn't the case.

The main ingredients in most regular toothpastes are potentially harmful and can irritate gums, soft tissue inside the mouth, and sensitive teeth. The United States Food & Drug Administration (FDA) has even required that all fluoride toothpastes sold in the U.S. carry a poison warning on the label.

Most major brands are loaded with questionable ingredients:

- Sodium fluoride: a toxin and industrial waste by-product.
- Sodium saccharin: an artificial sweetener that has been determined to cause cancer in laboratory animals.
- Sodium lauryl sulfate (SLS): a strong, harsh detergent used in industry as a degreaser and cleanser.
- Sodium hydroxide: also known as lye, a caustic cleaning agent that digests tissue.

SunSmile® Herbal Toothpaste is a healthier choice because it contains no harmful ingredients. Formulated with baking soda and a combination of fruit enzymes and herbal extracts, it delivers effective yet gentle cleaning action. Safe to swallow and with a refreshing mint taste, SunSmile® Herbal Toothpaste is ideal for the entire family.

No Bad Stuff

Free of artificial sweeteners, colors, and flavors.

Naturally Refreshing

Leaves your mouth feeling clean and refreshed without altering your taste.

Safety

Made without fluoride and other potentially harmful ingredients, so it's safe for kids.

Herbal Extracts

Exclusive combination of herbal extracts including clove oil, eucalyptus oil, peppermint oil, licorice extract, neem tree extract, and cassia seed extract.

Fits Your Life

The smart choice for your entire family.

Owner Expertise

Researched, developed, and made by Sunrider in Southern California.
