TINA 2 UNIVERSAL RETRO FIT KIT

If most makes of doors require their own, often very costly, equipment, PORTALP offers a new universal and effective repair solution that is compatible with the largest brands on the market.

The TINA 2 retro fit kit is installed in place of the old automatic sliding door operator.

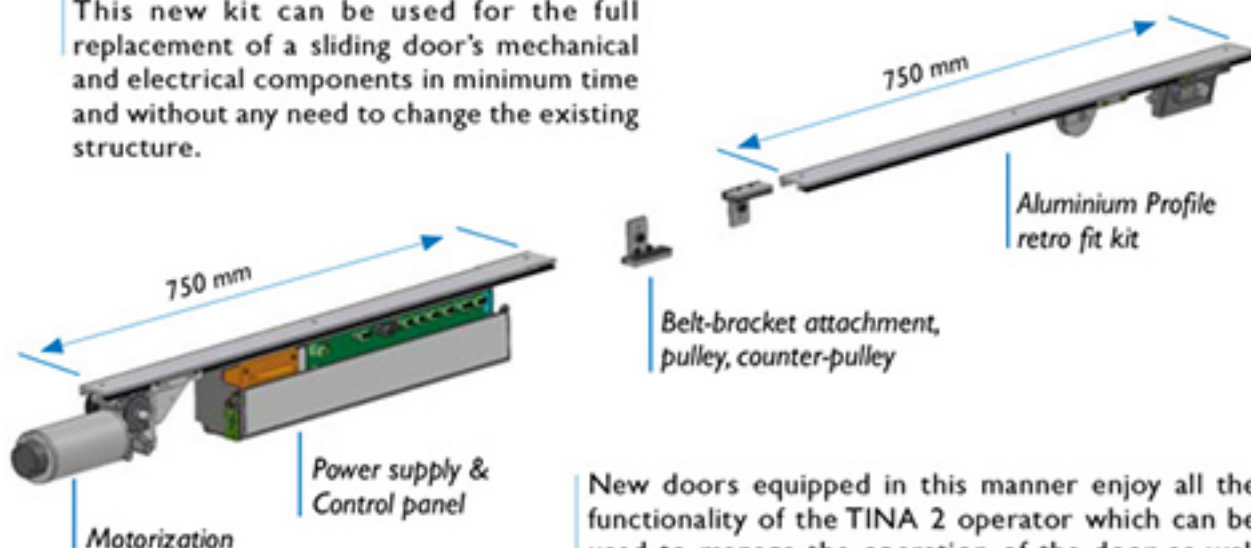

Swisstech

PORTALP
AUTOMATIC DOORS

The new TINA 2 retro fit kit comprises a TINA 2 door operator and the equipment required to drive the doors. PORTALP offers a simple universal modernisation, replacement and repair solution that fits into a great number of casings. Most major makes of automatic sliding doors can thus be repaired quickly and without major work.

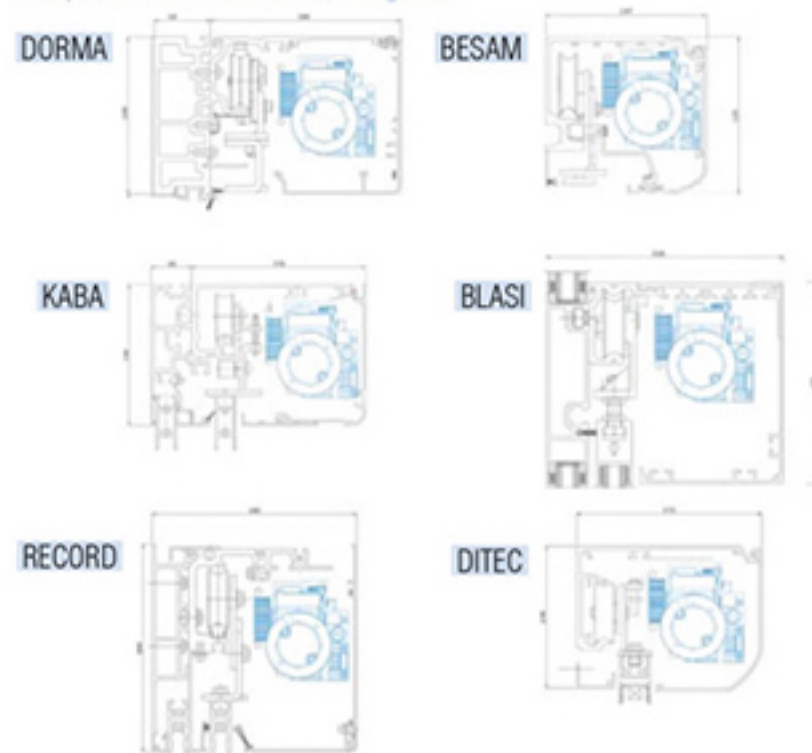

PERFORMANCE & FLEXIBILITY

This new kit can be used for the full replacement of a sliding door's mechanical and electrical components in minimum time and without any need to change the existing structure.

New doors equipped in this manner enjoy all the functionality of the TINA 2 operator which can be used to manage the operation of the door as well as its security and detection mechanisms. PORTALP control systems can be installed, as well as Intrinsic Mechanical Energy equipment (French regulations).
